

KUHN 45° POWER FORCEPS

US patent
(#10,376,277)

“I have not come across any task in the eye that I am not able to do with the Kuhn 45° Power Forceps.”

Professor Ferenc Kuhn

The Kuhn 45° Power Forceps is designed for peeling proliferative intravitreal, epi and sub-retinal membranes, lens capsule, iris, small IOFB, fibrinous membranes and more. The forceps is also suitable for peeling standard ILM and ERM membranes and attached posterior hyaloids.

Its unique tip design enables exceptional visualization while grasping the target tissue, with a 45° crocodile design inner surface that enables selective and strong grasping of the target tissue, regardless of its rigidity, size, orientation, or surface texture.

Available in 23G and 25G in both reusable (R06) and disposable (D06) versions. The reusable forceps will be delivered including the unique cleaning and sterilization holder. The disposable versions are packaged box/5, Sterile.

23 Gauge

Art.No.: FC23.R06
Art.No.: FC23.D06

23G Forceps Kuhn 45°
Power Gripping

25 Gauge

Art.No.: FC25.R06
Art.No.: FC25.D06

25G Forceps Kuhn 45°
Power Gripping
